

Site info

This web site is powered by Joomla!, which is free software released under the GNU/GPL license. Joomla! is one of the leading open source content management systems and benefits from a design that allows a variety of services to be easily added. The strength of the large user and developer base of Joomla insures that new features are delivered on a timely basis and that security issues are constantly monitored and repaired.

The machine powering this site uses Apache 1.3.41, under Mac OS X, 10.4.11 on a Macintosh G4 Gigabit Ethernet tower that has dual processors (1 megabyte backside cache), with 1 gigabytes of RAM, a Sonnet Tempo ATA-100 PCI EIDE adapter card and two 80-gigabyte hard drives from Western Digital. Additional software includes PHP 5.2.4 (Entropy.ch release), MySQL 4.0.24 and Webmin 1.250. It is connected to the Internet via an ADSL line provided by AT&T (nee SBC, nee PacBell), 512kbps up, using routers and switches from Netopia and NetGear.
